

Laser Tracker Measurement System

Innovative Solution to Accurately Align, Inspect, Digitize and Set-Up Parts and Machinery

Portable, contact coordinate measurement system.

- Perform measurements in less time and with higher accuracy
- Digital Set-up of Parts and Machinery
- Reporting and Validation of Conditions Before and After
- No lifting equipment needed (cranes)
- Less machinery charges (flange facers)
- Limited or no scaffolding needed
- Validation of Inspection Results

TEAM[®] Industrial Services
